

CHEMOTHERAPY PRECAUTIONS

SUPPLIES:

- Chemo pad
- (2) pair chemo gloves
- (1) chemo gown
- Sodium Chloride flush
- Heparin Flush
- Alcohol wipes

PROCEDURE:

1. Place chemo pad on work surface.
2. Put on chemo gloves and gown.
3. Prime tubing over chemo pad (if needed).
4. Place chemo pad under injection site.
5. Clean the injection cap with an alcohol wipe vigorously for 30 seconds.
6. Connect the tubing to injection cap.
7. Infuse medication as directed.

AT COMPLETION OF INFUSION:

1. Close clamp on tubing.
2. Place chemo pad under injection site and disconnect tubing (make sure end on tubing stays on chemo pad).
3. Clean the injection cap with an alcohol wipe vigorously for 30 seconds and air dry for 60 seconds.
4. Flush line with appropriate flushes as ordered.
5. Discard tubing and bag in chemo container.
6. Remove chemo gown and chemo gloves and discard in chemo container.
7. Wash hands after removing protective equipment.
